Do you suffer from OCD?

We are looking for patients who are suffering from Obsessive Compulsive Disorder aged 22-68 years, to participate in a study using transcranial magnetic stimulation.

This study may help researchers develop ways to effectively and non-invasively treat OCD. Participants will be evaluated by a licensed psychiatrist and a qualified study coordinator. There is no cost to participate and participants will be compensated.

Principal Investigator: Herbert Ward, M.D
Department of Psychiatry
University of Florida College of Medicine
