Is someone you know feeling blue? 

ADOLESCENT DEPRESSION STUDY

We are conducting a clinical study investigating a non-drug therapy that may help with adolescent depression for:

- Patients 12 to 21 years old
- Resistance to prior antidepressant medication
- Depression illness lasting greater than 4 weeks and less than 3 years

Study participants will receive:

- No-cost treatment of an investigational non-drug treatment for depression in adolescents

The non-drug treatment has been FDA-cleared for adults (22-70 years of age). This trial will be investigating the safety and efficacy of this treatment in adolescents.
